

CLLRCMCE C08-270

Remote Control for Windows® Media Center

With this remote control for your Windows Media Center based-PC or notebook you can access all your music, photos, TV, movies, and the latest in online media while you are relaxing on the couch! You can use the remote control to interact with lots of the multimedia features in Windows Media Center. Since the communication of the Remote Control is Radio Frequency (2.4GHz) based you are not restricted to use it in "line of sight", like normal Infra Red Based remote controls.
